

EIC ACCELERATOR

The EIC Accelerator is an intense, rapid and immersive program for developing high-potential ventures.

Accelerator participants work in teams. The main goal of the program is to advance a venture to the point where it is ready, and the team is poised for raising seed funds. The program will hold a Demo Day towards the end of the accelerator period.

Workshops, mentoring, and coworking space, combined with the supportive environment of SCE and the EIC startup community, empowers new entrepreneurs and cultivates the formation of new companies.

The EIC Accelerator staff work collaboratively with leading companies from low and high-tech industries as well as with hospitals and defense and security interests. The EIC Accelerator is open to EIC students, faculty, staff and alumni.

Funding sought for the EIC Accelerator: \$100,000
